**What have you understood about relationship ?**

In any relationship whether its friend or other we should understand our partner

There is much difference between love and attraction. If you love person with soul then there is a true love.

Relationship is not just a love

Friendship is not just based on love. Anyone can have relationship.

What's relationships, how to behave in relationship and how to respect.

Every relationship is built up with love

I understood that best friend is who believes in you and think about your welfare,

Introduction to Big Data

- What is Big Data?
- Meaningful insights about the trends, correlations and patterns that exist within big data can be difficult to extract without vast computing power.
- But the techniques and technologies used in big data analytics make it possible to learn more from large data sets. This includes data of any source, size and structure.
